

GhostFounder: AI-Powered Startup Acceleration

The All-in-One Platform for Modern Startup Teams

GhostFounder empowers founders to build, pitch, and manage their ventures with unprecedented speed and efficiency, leveraging cutting-edge AI and blockchain technology.

Startup Growth is Slow and Complex

Founders face challenges in code quality, fundraising, and equity management.

- Maintaining high code quality while iterating rapidly is difficult.
- Creating professional, investor-ready pitch decks is time-consuming.
- Managing equity and cap tables can be complex and error-prone.
- Accessing and understanding data efficiently is a bottleneck.

GhostFounder: Your AI Co-Founder

Automating key startup functions from code to capital.

- AI-powered code reviews ensure quality and security.
- Automated pitch deck generation from project documentation.
- Blockchain-based equity management for transparent cap tables.
- Natural language interface for seamless database querying.

Key Features for Accelerated Growth

A suite of intelligent tools designed for startup velocity.

- ****Code Police:**** AI code reviews for security, performance, and bugs.
- ****Pitch Deck Studio:**** Generates investor-grade decks from READMEs.
- ****Equity Distribution:**** Blockchain-based ERC-20 tokens for cap table management.
- ****Database Agent:**** Natural language queries for PostgreSQL, MySQL, MongoDB.

Targeting the Global Startup Ecosystem

Empowering early-stage companies to compete and scale faster.

- Millions of early-stage startups globally.
- Founders and development teams seeking efficiency.
- Venture Capital firms looking for well-prepared companies.
- The growing demand for AI-driven productivity tools.

Value Creation Through Efficiency

GhostFounder drives value by reducing operational overhead and accelerating time-to-market.

- SaaS model with tiered subscription plans.
- Premium features for advanced AI and blockchain capabilities.
- Potential for enterprise solutions for larger organizations.
- Enabling faster iteration and fundraising cycles for clients.

Building Momentum

Live demo available and actively deployed on Railway.

- Developed using modern tech stack: Next.js, TypeScript, Tailwind CSS.
- Integrated with AI (Gemini) and Blockchain (Ethereum Sepolia).
- One-click deployment to Railway for rapid scaling.
- Comprehensive documentation and active community contributions.

Join the Future of Startup Building

Experience warp-speed development with GhostFounder today.

- Try the live demo: [ghostfounder.up.railway.app] (<https://ghostfounder.up.railway.app>)
- Star on GitHub to support our mission.
- Explore the documentation for in-depth guides.
- Contribute to building the ultimate startup toolkit.
